

Diana Rein-Long Road

I put "Long Road" from Diana Rein in my player. I had not been familiar with her work. I heard a pure, clear voice. I heard rousing electric guitar. I heard a band that was tight and together. Impressive! Then I read the liner notes- "Diana Rein: Vocals, Guitars, Bass, EZDrummer". Diana is all by her lonesome! Is it any wonder the band was so together? In the notes, Diana tells us, "The making of this album rescued me from just dreaming about playing the guitar and brought the music I was hearing to life." I read on and found that the 12 songs on "Long Road"

are all Rein's originals and that the album was also produced by her. Talk about multi-talented!

The listener gets a good taste for Diana Rein's sparkling vocal tone on the first song, which is also the title track. I love the guitar riffs on "Wild One", my favorite song. "Come Back Home" is another favorite.

"Long Road is proof that Diana Rein can do whatever she wants musically-writing, singing or playing. "Long Road" is an unbelievable album from an unbelievable talent. Get yourself a copy today!
